EBSCO search result page for the article "ELIZABETH TOLLET AND HER SCIENTIFIC SISTERS". The page includes navigation links for "Result List" and "Refine Search", and a page indicator "4 of 51". The article details are as follows:

- Authors:** Fara, Patricia¹
- Source:** *History Today*, Apr2009, Vol. 59 Issue 4, p52-58. 7p. 10 Color Photographs, 3 Black and White Photographs.
- Document Type:** Article
- Subject Terms:** *LITERATURE & science, *WOMEN poets, English, *NATURAL history, *WOMEN – Social conditions, *HISTORY, *INTELLECTUAL life, 18TH century
- Geographic Terms:** GREAT Britain
- People:** TOLLET, Elizabeth
- Abstract:** The article discusses the scientific and scholastic pursuits of women in the 18th-century and focuses on the example of English poet Elizabeth Tollet and her interest in natural science. Discussion is given noting how women were not taken seriously in the scientific community of the time but it is suggested that the writings of Tollet, like other women of her era, gave her a medium to express her interest in serious studies. An overview of Tollet's works which display her knowledge is given along with biographical details of her life.
- Author Affiliations:** ¹Senior Tutor of Clare College, Cambridge
- Full Text Word Count:** 3470

On the right side, there is a "Tools" menu with options: Add to folder, Print, E-mail, Save, Cite, Export, Create Note, Permalink, Share, Listen, and Translate. A blue arrow points to the "Cite" option.

Click on Cite. Scroll down until you find the citation style needed (typically MLA).

The "Citation Format" window displays the following information:

NOTE: Review the instructions at [EBSCO Support Site](#) and make any necessary corrections before using. Pay special attention to personal names, capitalization, and dates. Always consult your library resources for the exact formatting and punctuation guidelines.

Fara, P 2009, 'ELIZABETH TOLLET AND HER SCIENTIFIC SISTERS', *History Today*, 59, 4, pp. 52-58, Academic Search Premier, EBSCOhost, viewed 23 October 2014.

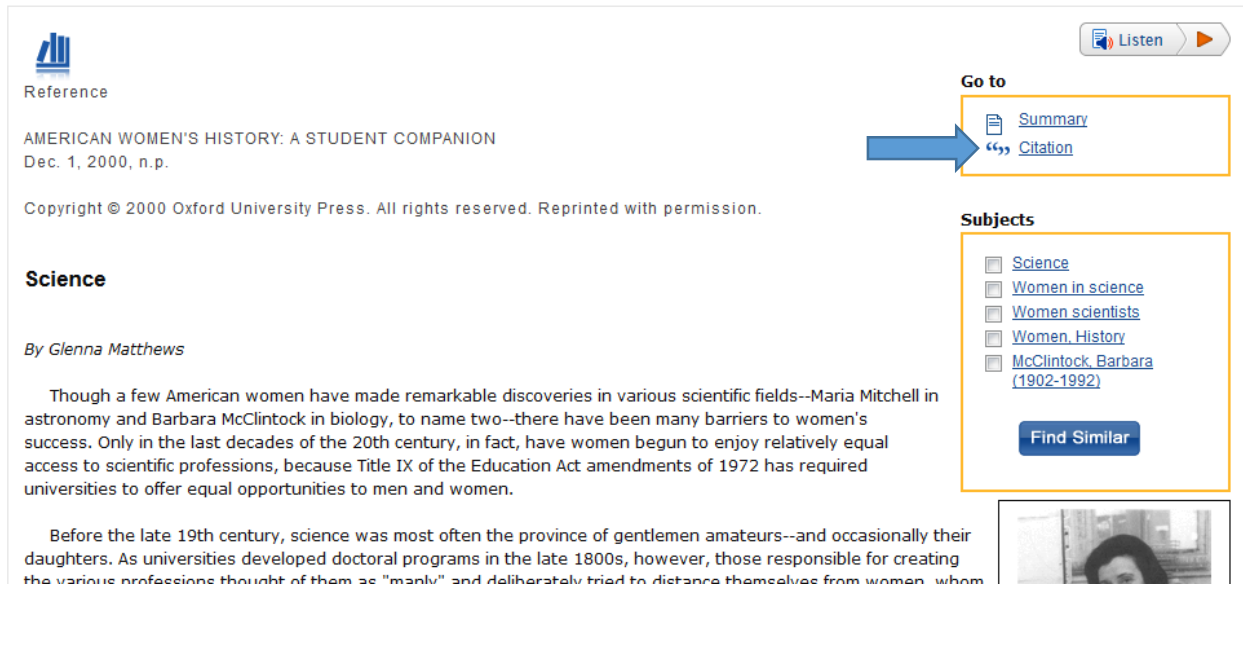

The window lists two citation styles:

Science

By Glenna Matthews

Though a few American women have made remarkable discoveries in various scientific fields--Maria Mitchell in astronomy and Barbara McClintock in biology, to name two--there have been many barriers to women's success. Only in the last decades of the 20th century, in fact, have women begun to enjoy relatively equal access to scientific professions, because Title IX of the Education Act amendments of 1972 has required universities to offer equal opportunities to men and women.

Before the late 19th century, science was most often the province of gentlemen amateurs--and occasionally their daughters. As universities developed doctoral programs in the late 1800s, however, those responsible for creating the various professions thought of them as "manly" and deliberately tried to distance themselves from women, whom
